

RIDFINDER PRODUCT OVERVIEW

Three detection roles. Every specification available on written request - we publish what is verified and say plainly what is not.

RANGER - portable / handheld

Role: walk-tests, event sweeps, vehicle patrol.

Hears: Remote ID broadcasts (standards per model, on request).

SENTINEL - fixed site

Role: 24/7 perimeter monitoring, PoE, MQTT and REST output.

Hears: RID broadcasts; RF-spectrum layer per configuration.

CORE - OEM module

Role: detection capability for your own product or platform.

Integration: documented interface draft, engineering support.

Evidence discipline

Measured (our tests, conditions stated) / vendor-reported (with date checked) / community (credible, not replicated). No invented ranges anywhere - full specifications on written request.
